Our Business is Research

2010 Product Guide

Fast... Accurate... Powerful...

Summary

U.S. Business Reporter is an online business and economic information resource providing corporate, financial, industry, marketing, retail, investment, and legal research intelligence in a concisely comprehensive integrated electronic platform.

A school K-12 institutional subscription to U.S. Business Reporter offers users unlimited and unparallel access to the dynamic world of business and industry.

- * Millions of comparable data and statistics on industries, companies, and markets.
- * Forward-looking industry, retail, investment analysis and company perspectives.
- * Insightful and creative commentary from expert analysts.
- * Periodic industry, economic, retail, and investment report updates to ensure you have the latest detailed analysis.

The U.S. Business Reporter has a wide variety of product applications that can be used and customized across a company's functional departments in marketing, strategic planning, finance, administration, legal, purchasing, or operations. Whether you are advising clients on entering new markets, launching products and services targeted to new consumer market segments, benchmarking a company against its competitors, or investigating the growth potential of specific industry sectors, U.S. Business Reporter offers research you can depend on.

Its simple, user-friendly interface makes it easy to navigate from statistical data points to supportive written report analysis.

U.S. Business Reporter business database supports teaching for college preparatory classes in :

- Business Administration
- Economics
- Humanities
- Social Sciences
- International Business
- Hospitality Management
- Food Marketing
- International Relations
- Environmental Health
- Public Administration

Access a vast amount of research through a single web platform.

U.S. Business Reporter is organized into 9 major categories which consists of Corporate Research, Financial Research, Industry Research, Retail Research, Market Research, Economic Research, Business Law, Investment Research, and Business Statistics. Sub-sector categories are provided underneath these major categories on the home page. The sub-sector categories allows a user to speed directly to a specific content area. Our user-friendly interface reduces the number of steps necessary to reach the information you need.

U.S. Business Reporter gives your students more and better choices in research reference sources and tools.

U.S. Business Reporter provides your students the information components to assemble their own reports, studies, term papers, and dissertations.

Industrial Strength Business Intelligence.

U.S. Business Reporter is powered by an integrated network of over 100 industrial strength databases to deliver the most efficient access to the user.

Historical Perspectives.

U.S. Business Reporter not only covers current data but also historical industry, financial, economic, and market data.

U.S. Business Reporter can even work as a substitute for industry newsletters and industry trade magazines which can be shared across an entire company.

A User Friendly Web Interface.

Intuitive online navigation makes it easy to find research by simply browsing through the site.

U.S. Business Reporter is an integrated information system. All content is available in one web interface. Therefore, users can perform a single search to find statistics, reports, financials, and other research.

All reports and data are cross-referenced to other links and related content. This makes it easy for users to find content they might not have known existed.

Powerful data analysis functions allows users to review datasets through pre-built in queries to enhance their research needs.

It is even easy to save searches and export results to Microsoft Excel and Adobe Acrobat.

Robust Research Methodology.

U.S. Business Reporter's data and analysis is researched from thousands of national and international sources. Methodologies vary depending on the nature of the information being collected and analyzed, but they are always consistent across companies and industries to allow comparisons.

U.S. Business Reporter is transparent about its research methodology and sources. Detailed data definitions are provided to ensure users understand the research and use it with confidence.

School K-12 Library Solutions.

The U.S. Business Reporter School K-12 Edition is designed specifically for student preparatory classes to the higher education community. Students are more prepared when they enter colleges and universities because our content is an important foundation to university course work.

In addition, U.S. Business Reporter is an effective research tool for college professors who need to perform in-depth research on various topics in business and economics. College professors has been used to prepare course materials, lecture assignments, compliment textbooks, and lectures, and to perform basic research The extensive information allows users to find the information they need with a minimum amount of research time.

U.S. Business Reporter is an effective learning tool because it compliments class lectures and textbooks to enhance the learning process.

Key Features and Benefits.

Dedicated Computer Access. The U.S. Business Reporter service is provided through IP Access. This service is exclusive to the IP address of your college and university. U.S. Business Reporter is hosted from a dedicated computer that is exclusive to your university.

Remote Access. U.S. Business Reporter provides remote access which allows your students to gain valuable access to our information from an off campus location. This is a major convenience since students can access our database at odd hours when the library is closed. This includes holidays, weekends, or because of time conflicts with student schedules. Remote access is included with your school k-12 subscription at no additional charge. Students can access the full database using a special patron access code such as student ID, username, or password authorization code.

Usage Statistics. U.S. Business Reporter provides a web-based usage statistics system for all institutional subscribers. The statistics adheres to the guidelines set forth by the International Coalition of Library Consortia (ICOLC). Statistics can generally be gathered on a daily, weekly, monthly, or yearly basis for any single library. Statistics can be reported with the IP's provided or for each username and password assigned. Consortia has the ability to view all the statistics for each library or system. However, individual libraries may only view their own statistics.

Extranet Services. The USBR Extranet Services allows you to access a wide variety of ancillary services at no additional charge. The USBR Extranet Service is available to the library administrator or key contact at your institution. You can add more users to access our extranet services at your company. The USBR Extranet Service is a self-service system which allows you to lookup your account online, upgrade your account, update contact information, change username/passwords, renew your account, download user manuals, download invoices, download contracts, add newsletters, and more. You can perform any of these functions 7 days a week, 24 hours per day.

Learning Tools. Learning tools is a special section developed exclusively for the School k-12 Edition of U.S. Business Reporter to supplement college textbooks and provide interactive learning.
