Our Business is Research

2010 Product Guide

Fast... Accurate... Powerful...

Summary

U.S. Business Reporter is an online business and economic information resource providing corporate, financial, industry, marketing, retail, investment, and legal research intelligence in a concisely comprehensive integrated electronic platform.

An corporate institutional subscription to U.S. Business Reporter offers users unlimited and unparallel access to the dynamic world of business and industry.

- Millions of comparable data and statistics on industries, companies, and markets.
- Forward-looking industry, retail, investment analysis and company perspectives.
- Insightful and creative commentary from expert analysts.
- Periodic industry, economic, retail, and investment report updates to ensure you have the latest detailed analysis.

The U.S. Business Reporter has a wide variety of product applications that can be used and customized across a company's functional departments in marketing, strategic planning, finance, administration, legal, purchasing, or operations. Whether you are advising clients on entering new markets, launching products and services targeted to new consumer market segments, benchmarking a company against its competitors, or investigating the growth potential of specific industry sectors, U.S. Business Reporter offers research you can depend on.

Its simple, user-friendly interface makes it easy to navigate from statistical data points to supportive written report analysis.

U.S. Business Reporter is the business database of choice for world-leading companies:

- Investment Banks
- Management Consultants
- Insurance Companies
- CPA Firms
- Advertising Agencies
- Government Agencies
- Packaged Goods Firms

Access a vast amount of research through a single web platform.

U.S. Business Reporter is organized into 9 major categories which consists of Corporate Research, Financial Research, Industry Research, Retail Research, Market Research, Economic Research, Business Law, Investment Research, and Business Statistics. Sub-sector categories are provided underneath these major categories on the home page. The sub-sector categories allows a user to speed directly to a specific content area. Our user-friendly interface reduces the number of steps necessary to reach the information you need.

U.S. Business Reporter gives your managers more and better choices in research reference sources and tools.

U.S. Business Reporter provides your managers with the information components to assemble their own internal reports.

U.S. Business has a strong editorial focus which has made our business and economic reports some of the most highly sought resources for corporate managers.

Objective Content.

U.S. Business Reporter has no advertising as with other publications. With no advertising, our research material and industry reports are never compromised or influenced by advertisers. This gives users an unbiased and objective perspective of the business world and the research that we present to you.

High-Level Performance.

We believe that our product is one of the fastest and most powerful business database's on the market today. Our technical engineers and designers have delivered a product that that minimizes bottlenecks to page access such as minimal intensive graphics, pictures, and frames which can slow down a database. A fast database makes you more time-efficient and much more productive.

An Integrated Approach.

U.S. Business Reporter is a well-rounded product because it features all the major functional areas of business and research in a single product. This is unusual and unlike most business databases on the market today. This allows you to achieve strong ROI by supporting a wide range of business functions and delivering a stronger return on your investment. This includes corporate strategy planning, Financial management, Economic analysis, product and brand management, Consumer insights, Competitive strategies, Channel management, Customer management, Supplier relationships, and more

Industry Research Section

We offer one of the most comprehensive sources of industry information on the internet. We offer an in-depth, constant evaluation of the top 50 industries, sub-segments and separate industry sector analysis section. In addition, we include an industry composite of financial data of all companies, SIC/NAICS searches, business ratios, and financial ratio comparisons.

- Industry Reports
- Industry Forecasts
- Industry Composites
- Industry Statistical Data
- Industry Norms and Business Ratios

Industry Reports offers comprehensive, high-level commentary, and industry analysis of the top 50 U.S. industries with coverage of sub-sector industries included.

Key sections include industry environment, market overviews, industry trends, industry issues, company overviews, industry outlook, industry forecasts, appendix, graphs and tables.

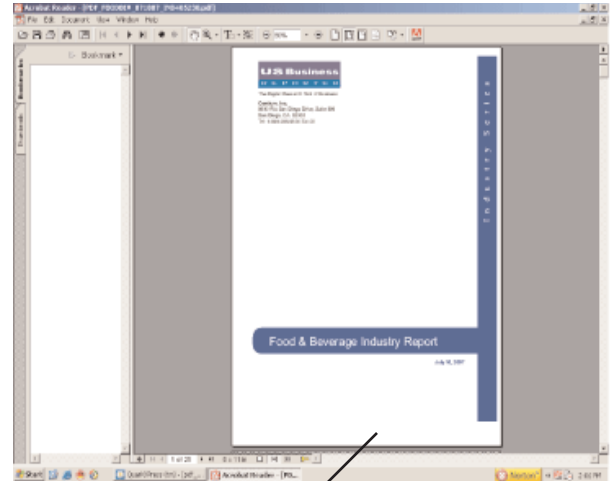

Strategy and Analysis. Each industry report focuses on key strategies of major industry players and analyzes their prospects under current and future industry conditions.

Data Composition. Each report analyzes company and industry data to make benchmark comparisons to current and historical patterns of data. Based on this data, we are able to draw conclusions about an industry's short and long-term prospects.

Market Overview. Each report gives a brief overview of current market conditions. This can include market value, percentage changes, and industry volume trends for the latest data on file. We include tables showing current industry pricing and trends to draw reasonable conclusions about future pricing trends.

Industry Sector/Segment Analysis. An analysis of industry sectors and market segments to show potential opportunities and problems that can impact an industry.

Industry Statistical Data. Allows rapid searching of key industry information through hyperlinks that are cross-referenced with industry forecasts and statistical trends. Industry information is categorized into specific sub-industry sections.

Industry reports are presented in a professional, executive-style PDF-format.

Standard Data Series	Frequency	Coverage	Format
US Steel - Production, Capacity, Utilization, & Consumption	Annual	United States	Table /Chart
US Steel - Shipments by Market Classification	Annual	United States	Table /Chart
aluminum - World Consumption of Refined Aluminum	Annual	United States	Table /Chart

Industrial Strength Business Intelligence.

U.S. Business Reporter is powered by an integrated network of over 100 industrial strength databases to deliver the most efficient access to the user.

Historical Perspectives.

U.S. Business Reporter not only covers current data but also historical industry, financial, economic, and market data.

U.S. Business Reporter can even work as a substitute for industry newsletters and industry trade magazines which can be shared across an entire company.

A User Friendly Web Interface.

Intuitive online navigation makes it easy to find research by simply browsing through the site.

U.S. Business Reporter is an integrated information system. All content is available in one web interface. Therefore, users can perform a single search to find statistics, reports, financials, and other research.

All reports and data are cross-referenced to other links and related content. This makes it easy for users to find content they might not have known existed.

Powerful data analysis functions allows users to review datasets through pre-built in queries to enhance their research needs.

It is even easy to save searches and export results to Microsoft Excel and Adobe Acrobat.

Robust Research Methodology.

U.S. Business Reporter's data and analysis is researched from thousands of national and international sources. Methodologies vary depending on the nature of the information being collected and analyzed, but they are always consistent across companies and industries to allow comparisons.

U.S. Business Reporter is transparent about its research methodology and sources. Detailed data definitions are provided to ensure users understand the research and use it with confidence.

Special Library Solutions.

The U.S. Business Reporter Special Library Edition includes a host of content features and functionality that is exclusive to this edition. An institutional subscription is specially designed for corporate libraries and information centers by giving knowledge workers in managerial and professional occupations access to a wide array of exclusive information and detailed data.

Exclusive content features includes:

- Detailed regional sales trend analysis
- Forensic Financial Data
- Cash Flow data composition tables
- Cash Flow ratio analysis tables
- Cash Flow historical ratio trends
- Built-in Query analysis Tools / What-If Scenarios
- Interactive Graphs and Tables
- Advanced Industry Statistics
- Commodity Statistics, Trends, and Analysis
- Marketing Data Maps

And More

Through the USBR Dimensions feature, the powerful technology of the corporate edition enables seamless integration of customer intelligence into existing CRM, intranets, and portal solutions. This eliminates unproductive searches and streamlines your workflow. Your organization saves time by delivering relevant information in one place that makes finding, sorting, and analyzing the right content much more smoothly.

U.S. Business Reporter is the business database of choice for managers and professionals:

- CPA's
- Management Consultants
- Investment Analysts
- Financial Analysts
- Financial Planners
- Marketing Managers
- Advertising Managers

With an institutional subscription, you spend less time searching for irrelevant information on internet search engines and more time on researching and analyzing on U.S. Business Reporter. In addition, providing access to multiple employees simultaneously encourages them to collaborate and share information across your company wide network and re-use knowledge and information. This makes people at your organization more productive everyday.

U.S. Business Reporter can help you meet your budgetary requirements. Instead of hiring extra support staff for research purposes, you can outsource this function to U.S. Business Reporter and save even more money. This can be an extreme savings to smaller organizations and gives proven ROI in 90 days.

Key Features and Benefits.

Dedicated Computer Access. The U.S. Business Reporter service is provided through IP Access. This service is exclusive to the IP address of your company. U.S. Business Reporter is hosted from a dedicated computer that is exclusive to your company. This reduces the possibility of downtime and guarantees better performance and page access from our service.

Volume Licensing. Our Digital Seat Licensing plans are an affordable and low cost alternative to purchasing individual subscriptions and single reports. Access industry reports, market research reports, economic reports, retail reports, investment reports, and bankruptcy reports for a set annual fee which can be shared across your company instantly. The license also includes all updates of reports for the duration of your subscription.

Service Packages.

The USBR Corporate Edition is designed for high-power corporate usage. The USBR Corporate Library Edition is available in two basic types of subscription configurations: Workgroup and Enterprise.

The Workgroup subscription plan allows you access to high-level business and industry information for a flat rate per annum. You can purchase licenses from 5 to 100 users at your company by allowing only actual users to gain access. The Workgroup subscription plan is designed especially for small and medium-sized companies that do not have a large staff. You can access the same pertinent information at a fraction of the cost.

The Enterprise subscription plan is designed for access on a company-wide basis with unlimited access. This includes access for multiple departments, divisions, or field offices whether on a national basis or global basis. In addition, access is through IP recognition and filtering. There are no arcane usernames or passwords to remember to use the product.

Extranet Services. The USBR Extranet Services allows you to access a wide variety of ancillary services at no additional charge. The USBR Extranet Service is available to the library administrator or key contact at your institution. You can add more users to access our extranet services at your company. The USBR Extranet Service is a self-service system which allows you to lookup your account online, upgrade your account, update contact information, change username/passwords, renew your account, download user manuals, download invoices, download contracts, add newsletters, and more. You can perform any of these functions 7 days a week, 24 hours per day.
